

THE WORLD MANAGEMENT PTE LTD

Add On Modules to SAP Business One

Form Layout Changer

With Form Layout Changer, it allows users to change the position of the fields in standard SAP Business One screen.

User can hide fields or move fields that are not required for ease of data entry.

The screen setting can be set at user level, group of users or company level.

The image displays two screenshots of the SAP Business One 'Delivery' form. Both screenshots show the same data: Customer No. DO09, 9001418; Status: Open; Posting Date: 29.07.2009; Value Date: 29.07.2009; Document Date: 29.07.2009. The form has tabs for Contents, Logistics, and Accounting. Below the tabs is a table with columns for #, Type, Item No., and Item Description. At the bottom, there are fields for Sales Employee (No Sales Employee), Owner, Remarks, and a summary section with fields for Total Before Discount, Freight, Discount, Rounding, Tax, and Total (SGD 0.00). In the right screenshot, the 'Freight' field in the summary section is circled in black, indicating it has been hidden.

An example: The user is not allowed to see the freight cost. With Form Layout Designer, the amount field for Freight tab is hidden.
