

THE WORLD MANAGEMENT PTE LTD

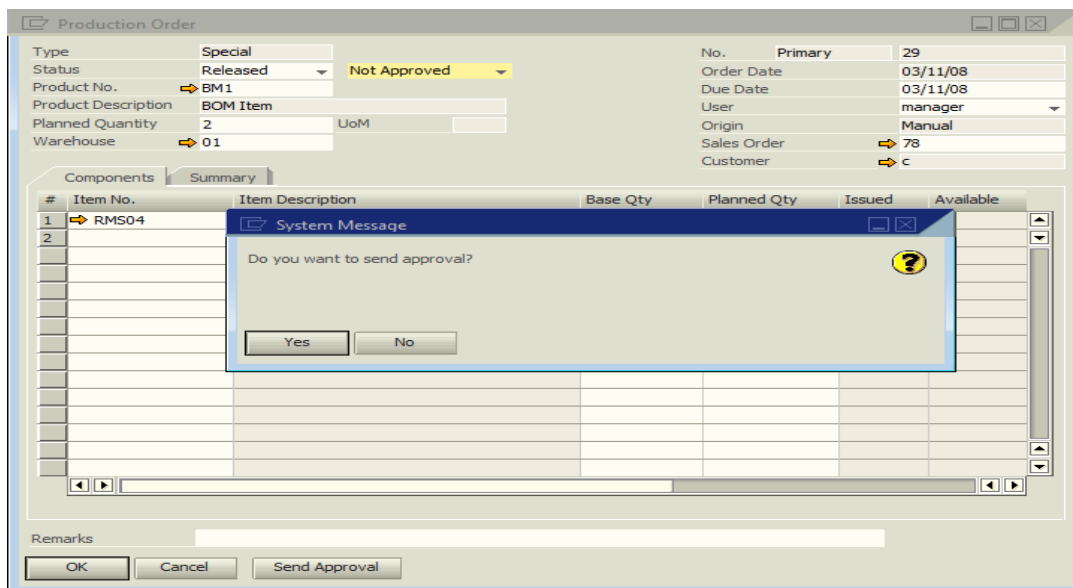

## Add On Modules to SAP Business One

### ***Production Approver***

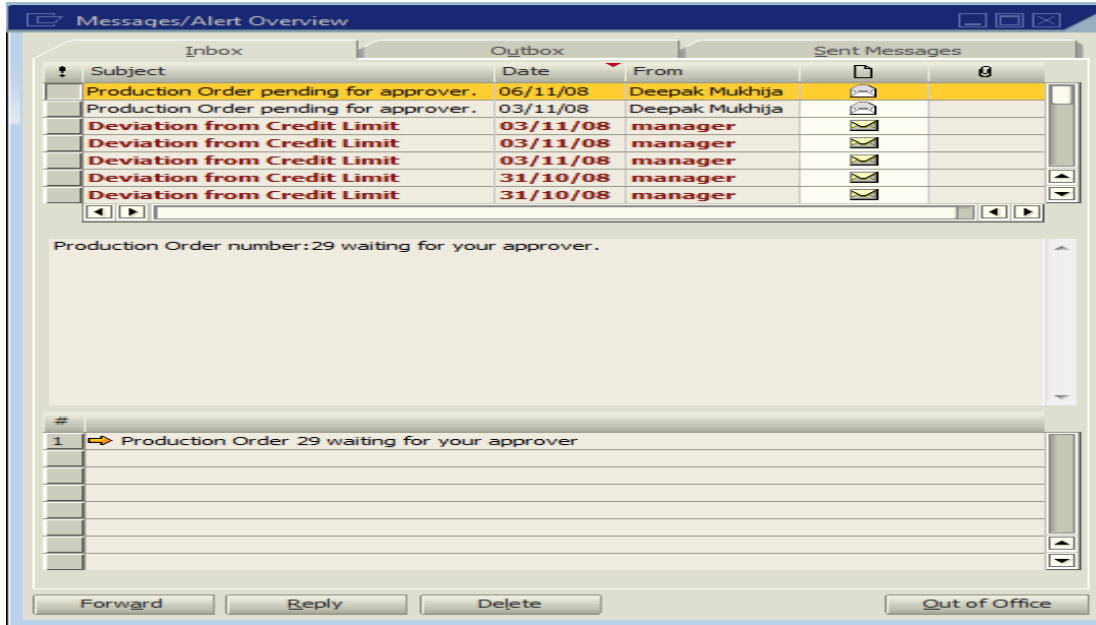

The standard SAP B1 lets you apply the approval template to Sales A/R and/or Purchasing- A/P documents only or to Inventory related documents only.

With Production Approver installed, it enhances the standard SAP Business one Production Order function by adding the approval process.

No amendments can be made once the production order has the status of approved.

The User sends the production order for approval and is unable to release the production order until it has been approved.

The User will receive a message on the status.

### ***Key Features***

- Allow set up of different approver
- Support of approval for production order via standard SAP Business One screen

### ***Minimum System Requirements***

- SAP Business One 2007
- MS-SQL Server 2005
- Windows XP Professional 32 bit
